

The background is a solid teal color. Overlaid on this are several thin, light blue lines that form a circuit-like pattern. These lines are most concentrated on the left side, where they form a dense, vertical structure resembling a bus or a series of interconnected nodes. Similar, but less dense, patterns appear on the right side, particularly towards the top and bottom corners. The lines are composed of straight segments connected by small circles, giving the impression of a printed circuit board or a network diagram.

# EDUROAM SERVICE IN MOLDOVA

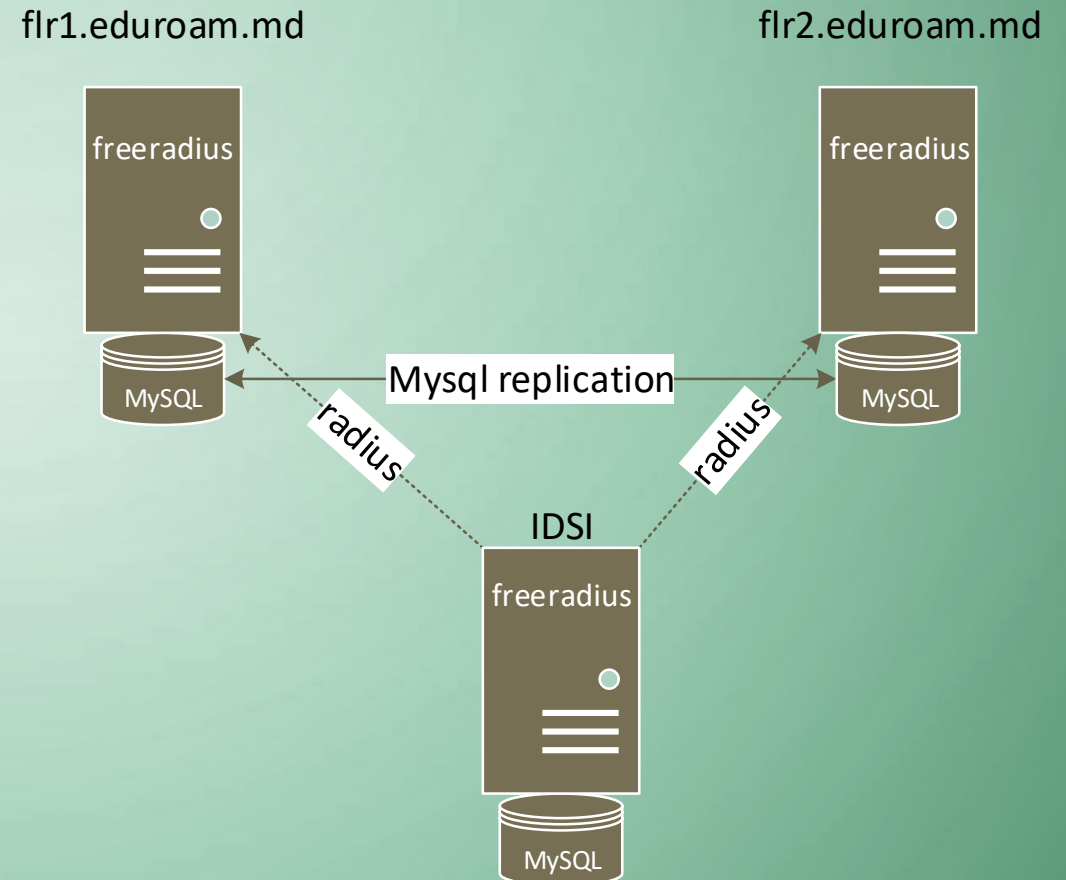

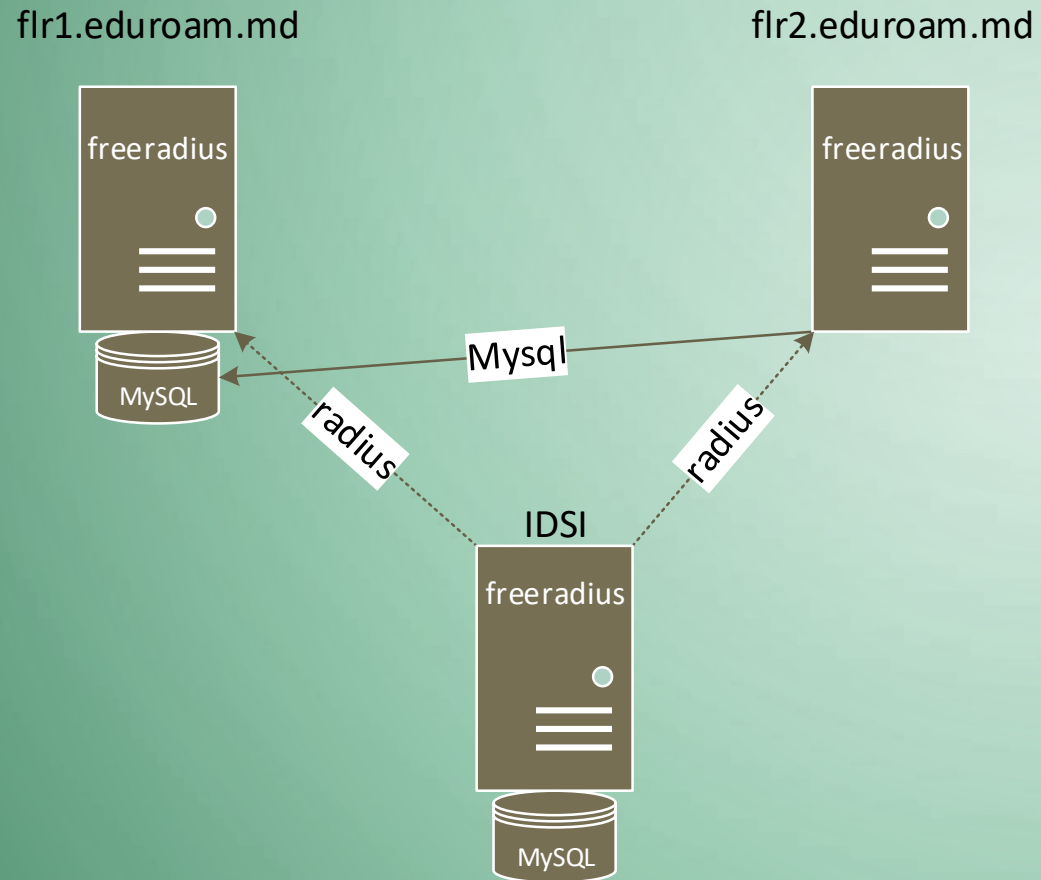

# A bit history...

Eduroam service runs in Moldova since 2013, as a result of the “wireless roaming Eduroam” training in May 2012.

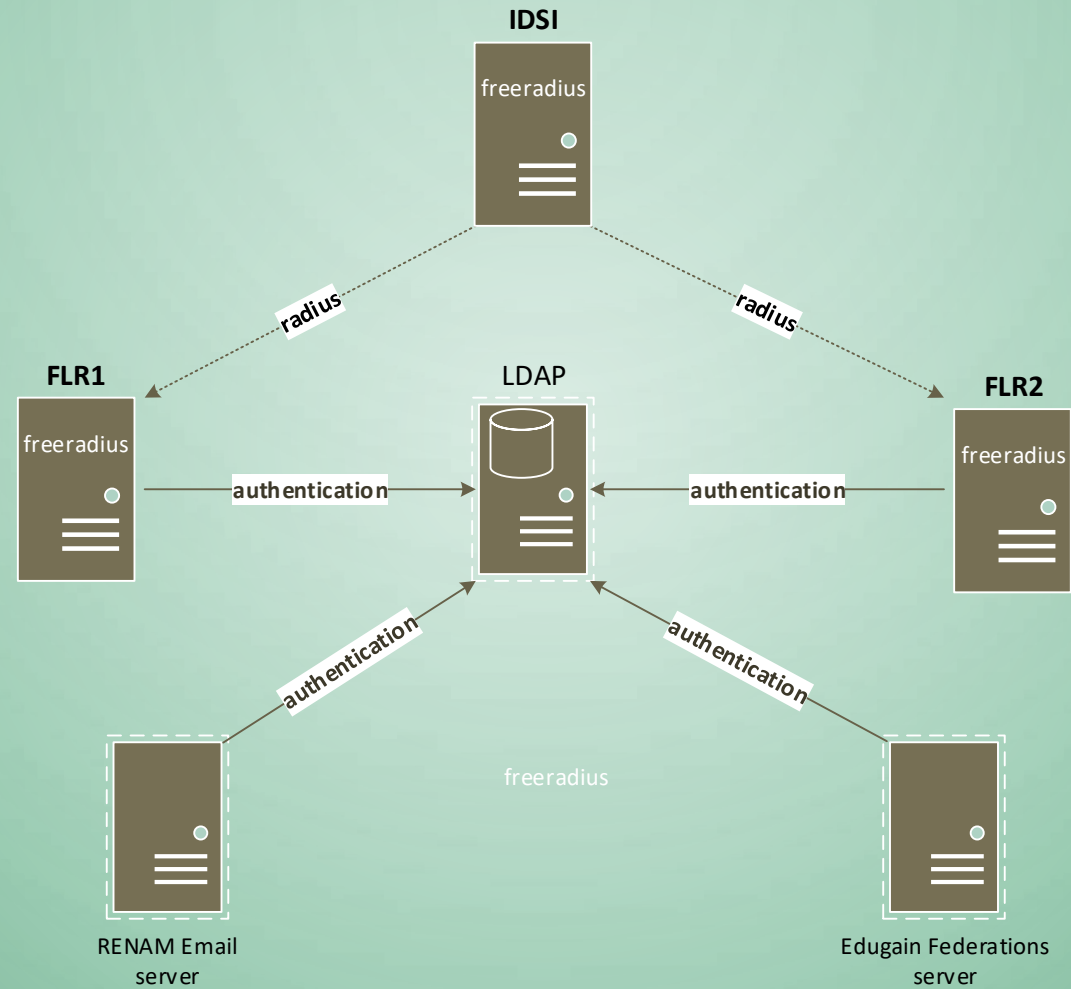

The first institution who signed eduroam agreement – Institute of Development of Information Society - IDSI (ASM)

Others institutions who use eduroam, but have not signed agreement: Institute of Mathematics and Informatics (IMI), Academy of Economic Studies (ASE), State State University from Cahul (USCH), Technical University (UTM)

# First servers topologies

# After implementing Edugain

# Promoting eduroam in Moldova

Meetings with universities and colleges staff (Teachers, IT staff, Management staff)

Creation of temporary accounts for institutions so that they can test the service and feel how useful it is

Presenting the service to the Ministry of External Affairs

# Future plans for eduroam

Implementing Radsec

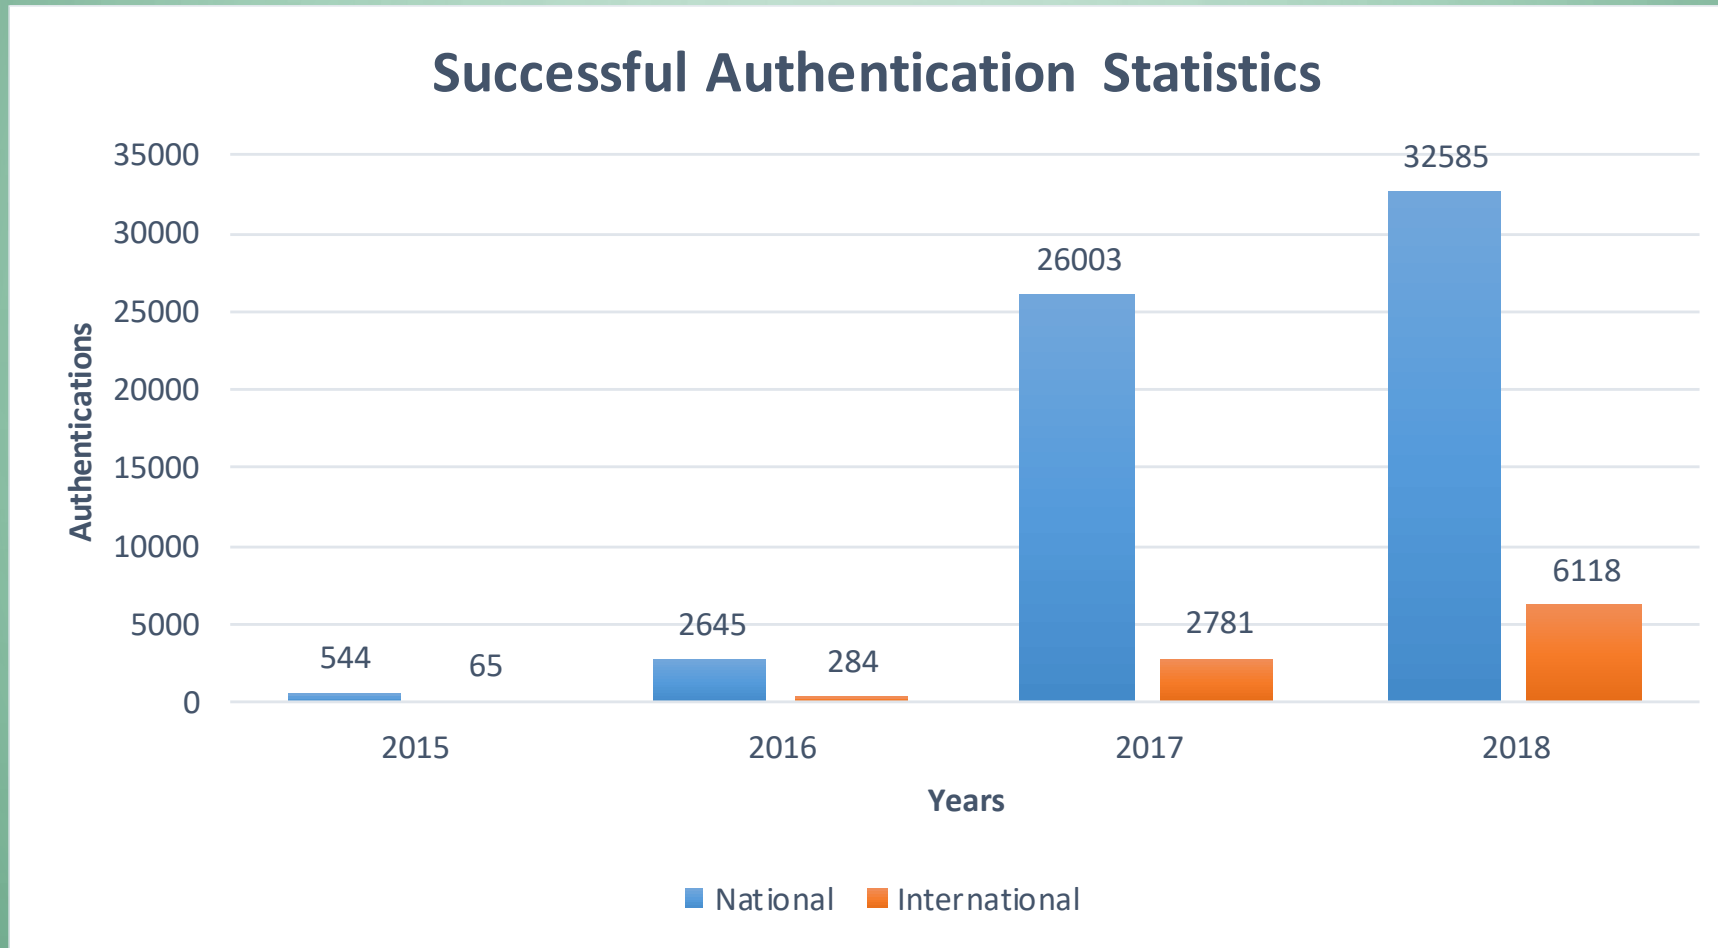

Promote Managed IdP services to institutions.

Make technical workshops for the IT staff of the universities.
